

PART N E T

Item #	User Story	Estimate	Sprint	Assigned To
1	As a person who has been prescribed a drug, I want to know the common reactions for a drug I have been prescribed so that I am prepared for possible complications.			
	The system shall display the following information about the drug for the constrained data set:			
	- Top 10 Brand Names			
	- Top 10 Generic Names			
	- Indications - Display top 10 indications for the drug selected			
	- Average Duration - average duration the drug was consumed			
1.1	before the event occurred with standard deviation - backend api.	Large	3	
1.2	Use PRR or ROR to scale graphical representation - only available on backend api			
1.2.1	Convert FAERS data to Elastic Search Index Data	Large	1	Back End Web Developer
1.2.2	Create REST webservice	Medium	2	
1.2.3	Implement Elastic search queries to fulfill web service	Large	3	
	The tabular and graphical views will use the PRR/ROR data			
1.3	instead of the count data	Medium	3	
1.4	Display a toggle on the UI to show where the data is coming from	Medium	3
