

Planning and setup tasks were done for Sprint 0.

	User Story	Estimate	Sprint	Assigned To
1	As a person who has been prescribed a drug, I want to know the common reactions for a drug I have been prescribed so that I am prepared for possible complications. The system shall display the following information about the drug for the constrained data set: - Top 10 Brand Names - Top 10 Generic Names - Indications - Display top 10 indications for the drug selected - Average Duration - average duration the drug was consumed before the event occurred with standard deviation - backend api.	Large	3	
1.1	Use PRR or ROR to scale graphical representation - only available on backend api	Large		
1.2	api			
1.2.1	Convert FAERS data to Elastic Search Index Data		1	
1.2.2	Create REST webservice		2	
1.2.3	Implement Elastic search queries to fulfill web service		3	
1.3	The tabular and graphical views will use the PRR/ROR data instead of the count data			
1.4	Display a toggle on the UI to show where the data is coming from	Medium	3
